IDENTITY RECORDS EXPOSED

## How Constella Helps

Constella empowers MDR and XDR providers to:

- **Expand detection** to include identity-based threats outside the perimeter.
- **Enhance analyst triage** with role-aware identity intelligence.
- **Deliver new ITDR capabilities** without disrupting existing workflows.
- **Differentiate their platforms** in a competitive managed security landscape by validating Zero Trust strategies.

*“Constella allows us to move beyond traditional endpoint-centric detection, delivering identity-aware protection that strengthens Zero Trust strategies for our Global 2000 clients.”*

# Powering Identity Threat Detection & Response (ITDR) for MDR/XDR Platforms

**Move beyond endpoint-centric detection to deliver identity-aware protection for Global 2000 enterprises.**

Two leading cybersecurity providers, a top-tier Managed Detection & Response (MDR) firm and a global Extended Detection & Response (XDR) platform, selected Constella to enhance the rollout of **Identity Threat Detection & Response (ITDR)** capabilities within their detection stacks.

By integrating Constella’s **verified identity intelligence** and **OSINT data signals**, these organizations are expanding threat visibility beyond endpoints—enabling early detection of identity-based threats, improved prioritization of user risk, and stronger protection across their clients’ ecosystems.

## Why Identity Intelligence Matters for MDR/XDR

**Closing the Endpoint Gap:** Attackers today increasingly target the identity layer—leveraging data exposed by infostealer malware, exposed credentials, and lateral movement tactics that bypass traditional endpoint defenses.

To keep pace, MDR and XDR platforms are evolving to support ITDR, with a focus on:

- **Monitoring** for exposed user credentials tied to client and vendor domains.
- **Detecting** infostealer infections and credential leaks in real time (Pre-Ransomware signals).
- **Prioritizing** threats based on identity sensitivity (e.g., execs, admins, privileged accounts).
- **Strengthening** incident response through “Identity-Aware” enrichment.

# Why Constella

Both providers sought a scalable way to embed identity visibility into their detection workflows, and chose Constella based on three core differentiators:

## Flexible Partnership & Deployment

- Rapid, API-based integration into existing MDR/XDR workflows.
- User-based licensing aligned to multi-tenant service delivery.
- Frictionless onboarding—from first contact to implementation in weeks.

## Breadth & Quality of Identity Data

- 1 Trillion+ verified assets and 200B+ breach records.
- Real-time ingestion of credential dumps and infostealer logs (OSINT Signals).
- QA-driven validation pipeline to eliminate false positives and synthetic breaches.

## Forward-Looking ITDR Vision

- Chosen as a long-term partner to support Identity-Aware Protection.
- Direct alignment with ITDR, Zero Trust, and identity-based risk initiatives.
- Supports continuous monitoring of identity exposures across global ecosystems.

## How MDR & XDR Providers Are Using Constella

Both providers leverage Constella's API to:

- **Enrich SOC workflows** and detection logic with high-confidence identity exposure signals.
- **Surface credential exposures** for both direct clients and downstream third-party supply chains.
- **Embed ITDR capabilities** within their broader XDR and MDR offerings to meet growing customer demand.

**Strategic Outcome:** This partnership enables them to move beyond traditional endpoint-centric detection, delivering Identity-Aware Protection that strengthens Zero Trust strategies and accelerates threat response.

Partner with Constella to extend your detection capabilities, reduce identity risk, and stay ahead of emerging threats.

Let's connect. Visit [Constella.ai](https://constella.ai) to learn more.

Constella Intelligence is a global leader in identity risk intelligence, helping organizations detect, investigate, and respond to threats linked to exposed personal data. Powered by the world's largest breach and infostealer data lake, spanning over one trillion attributes across 125+ countries and 50+ languages, Constella delivers unmatched visibility into identity threats across the surface, deep, and dark web. Enterprises and technology partners worldwide rely on Constella to strengthen identity posture, fuel threat intelligence, and reduce digital risk.
